

No Ordinary Plenum Fan.

AcoustiFLO is **the** performance-engineered, specific purpose plenum fan — designed to be the quietest, most compact, modular, energy-efficient fan you'll ever meet.

Our products are applied in factory-built, custom air handlers and field erected air-handling systems.

- Engineered Flow Path
- 100% Acoustic Cotton fill
 - 12" Outer Diffuser
 - 6" Inner Diffuser
- Optional Inlet silencer for critical applications
- Fully integrated internal spring isolation in each module eliminates flex connections

All AcoustiFLO products are AMCA certified for efficiency and acoustics and are used extensively on many projects requiring LEED certification.

AcoustiFLO

Technologically Advanced Air Handling Systems
